# THE SUBTERRANE DOCTRINE MAP

Structural Compression | Version 2.0 | June 2026

*Legibility through fidelity.*

One page. The whole architecture.  
Condition precedes consequence.  
Everything else follows.

ROOT AXIOM

# Condition precedes consequence.

*A measurable condition exists before an observable consequence.  
Measurement renders the condition legible before consequence expresses.*

ARCHITECTURE

### Physical Substrate

The gravitational flow field that governs all surface condition.

### Causality Lens™

Resolves the substrate into deterministic structural position.

### Causal Integrity Metric (CIM)

The scalar that makes condition legible, auditable, settleable.

### Geostructural Commons

The neutral ledger. Condition recorded; instruments settle against it.

### Nine Sovereign Instruments

Condition enters law, capital, and construction. Entered via CIM Phase 1.

OPERATIONAL CONSEQUENCES

ECONOMIC FRAME

## Response receives evidence. Prevention produces absence.

CIM makes the absence measurable. Prevention produces a record, not a void.
