v1.0 reference documents (January 2026) are archived at subterrane.info/subterrane-doctrine/ as provenance baseline.

PURPOSE

How to Navigate the Estate

The Subterranean public estate is organised in three layers: canon, provenance, and engagement. The canon states what the doctrine is. The provenance records how it arrived. The engagement pathways route a reader to the point of contact that matches their exposure.

LAYER I

Canon

The Subterranean Protocol v2.0

The settled state of the doctrine. Purpose, axioms, definitions, architecture, consequences, economics, governance, ontology.

https://subterranean.info/wp-content/uploads/2026/06/The_Subterranean_Protocol_v2_0.pdf

The Root-Layer Doctrine

The constitutional ancestor, preserved as published. The origin of Physical Substrate, the Causality Lens™, CIM, and Threshold Stewardship.

<https://subterranean.info/wp-content/uploads/2026/06/root-layer-doctrine.html>

LAYER II

Provenance

Volume Index

The chronological record of Dispatches 001-059, two volumes, with Substack links.

Complete Index

The conceptual record: principal concepts and corridors, alphabetical, mapped to dispatches.

Dispatch Archive

The Deep Frontier on Substack. The live, dated, public chronology - the chain of custody.

v1.0 Reference Estate

The January 2026 documents, archived at subterranean.info/subterranean-doctrine/ as provenance baseline.

LAYER III

Engagement Pathways

Four pathways. Not four products, but four consequences of one problem: a measurable condition exists, and different stakeholders arrive at it from different directions.

Atlas - evidence

Resolved structural corridor outputs, downloadable and purchasable. For the stakeholder who requires field-resolved product before anything else.

subterrane.info/atlas

CIM Phase 1 - measurement

The Causal Integrity Metric applied to a specific geography or infrastructure corridor. The entry instrument within the Nine Sovereign Instruments. For the stakeholder who requires the causal architecture applied to their exposure.

subterrane.info/cim-phase-1

Partnerships - deployment

Integration of the methodology into an ongoing programme. For the stakeholder whose operational exposure warrants structural continuity across a portfolio.

subterrane.info/partnerships

The Last Obstacle - proof

The original resolved corridor, awaiting drill commitment. For the stakeholder willing to force resolution in the ground.

subterrane.info/lastobstacle

The investor, the infrastructure operator, the sovereign planner, and the explorer ask different questions. Each arrives at the same structural problem. The four pathways are the four answers.
